Join us for a Northeast Ohio regional meeting to discuss health information technology, health information exchange and related privacy and security issues. During this meeting the Health Policy Institute of Ohio (HPIO) will present information on the Ohio Roadmap for Health Information Technology and Exchange. There will also be a brief presentation on the Development of a Regional Health Information Technology Organization for Northeast Ohio. HPIO will also describe the findings of the Health Information Security and Privacy Collaboration (HISPC) in Ohio. With the changes that are occurring in state leadership, this will be an important discussion. This meeting seeks to both inform and gather input from the Northeast Ohio community on the Roadmap and the HISPC project.
