

HISPC Ohio Community Meeting
Invitation to Mansfield Community Members

Dear Mansfield Community Member,

As you know, for a number of years there has been a great deal of discussion about moving from paper to electronic records in both health and human services, locally, statewide and nationally. The adoption of information technology is viewed as the primary method by which we can improve quality of care and reduce the cost of health care. Given the importance of this topic to our community, we would like to invite you to a meeting at the Third Street Family Health Services to have a more in depth discussion of these issues.

On December 7, 2006 from 1PM until 4PM, at 600 W. 3rd Street, there will be a Mansfield area regional meeting to discuss health information technology, health information exchange and related privacy and security issues. During this meeting the Health Policy Institute of Ohio (HPIO) will present information on the Ohio Roadmap for health information technology and exchange and also describe the findings of the Health Information Security and Privacy Collaboration (HISPC) in Ohio. This is an opportunity learn about local RHIOs around the state of Ohio and share what is happening in Mansfield with regard to HIT. To review the current version of these documents, please visit: <http://hispc.pbwiki.com/>

Please feel free to distribute this announcement to others who may be interested in this topic. This event is free and open to the public. No advance registration is need.

December 7, 2006

1 PM to 4 PM

600 W. Third St

Mansfield, Ohio 44906
